DETAILED ACTION

Election/Restrictions

Applicant's election with traverse of Group I in the reply filed on 11/6/06 is acknowledged. The traversal is on the ground(s) that there is no serious burden to examine all the groups. This is not found persuasive because compound of group I for example can be used in the in the formation of oligomers and said oligomer can use in the invention VII-XI.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Hendrix et al. (Chem. Eur. J. 1997, 3, No1, pp 110-120).

Hendrix et al. discloses a compound identical to the instant invention where B is a base, R3 is a protecting group, R1 is H, Y is O, R4 is H, R2 is OH. (see page 112)

Claims 1, 2, 7 are rejected under 35 U.S.C. 102(e) as being anticipated by Miculka et al. (US 6,613,894).

Miculka et al. discloses a compound identical to the instant invention where B is a base, R3 is a protecting group, R1 is a protecting group, Y is O, R4 is OH, R2 is OH (col. 15-16), L can comprise a C, N or O and a reactive group (col. 19-20, 26).

Claims 3-6, 8 10, 35 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 9 and 36 are allowed.
